# Patient—additional body function or structure affected, body function or structure code N[N]

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Additional body function or structure of patient affected
<b>METEOR identifier:</b>	532509
<b>Registration status:</b>	<a href="#">Health</a> , Standard 21/11/2013
<b>Definition:</b>	The body function or structure of the patient alleged to have been affected, in addition to the primary body function or structure affected, as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Patient—additional body function or structure affected</a>
<b>Value Domain:</b>	<a href="#">Body function or structure code N[N]</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N[N]	
<b>Maximum character length:</b>	2	
<b>Permissible values:</b>	<b>Value</b>	<b>Meaning</b>
	1	Mental functions or structures of the nervous system
	2	Sensory functions and pain of the eye, ear and related structures
	3	Voice and speech functions or structures involved in voice and speech
	4	Functions or structures of the cardiovascular, haematological, immunological and respiratory systems
	5	Functions or structures of the digestive, metabolic and endocrine systems
	6	Genitourinary or reproductive functions and structures
	7	Neuromusculoskeletal or movement-related functions and structures
	8	Functions and structures of the skin and related structures
<b>Supplementary values:</b>	9	Death
	97	Not applicable
	99	Not stated/inadequately described

## Collection and usage attributes

<b>Comments:</b>	The coding categories for this value domain are based on the chapter headings for body functions and body structures in the Body component of the World Health Organization's International Classification of Functioning, Disability and Health (ICF 2.1a) (WHO 2003).

## Data element attributes

### Collection and usage attributes

Guide for use:	<p>This data element should be used in conjunction with the data element <a href="#">Patient—primary body function or structure affected, body function or structure code N[N]</a> to provide a greater depth of information on the harm alleged to have resulted from the health-care incident.</p> <p>Up to three codes may be selected for this data element.</p> <p>CODE 1 Mental functions or structures of the nervous system</p> <p>'Mental functions or structures of the nervous system' should be recorded where psychological harm was an additional rather than the primary effect on the patient.</p> <p>CODE 2 Sensory functions and pain of the eye, ear and related structures</p> <p>'Sensory functions and pain of the eye, ear and related structures' should be recorded where the pain experienced as a result of the incident was an additional rather than the primary effect on the patient. Where the pain experienced by the patient is deemed to be more disabling than the associated physical or mental damage to the patient, record the body structure or structures with which the pain is closely associated as an additional body function or structure affected.</p> <p>CODE 4 Functions or structures of the cardiovascular, haematological, immunological and respiratory systems</p> <p>'Functions or structures of the cardiovascular, haematological, immunological and respiratory systems' should be recorded where an additional effect on the patient is a cancer that has progressed and affects major body systems. In the case of cancer primarily affecting a single organ or body part, the appropriate code for that organ or body part should be recorded. This rule should also be followed for other conditions affecting major body systems.</p> <p>CODE 9 Death</p> <p>'Death' is an invalid code for this data element but is a valid response for the data element: <i>Patient—primary body function or structure affected, body function or structure code N[N]</i>.</p> <p>CODE 97 Not applicable</p> <p>'Not applicable' is an invalid code for this data element but is a valid response for the data element: <i>Patient—primary body function or structure affected, body function or structure code N[N]</i>.</p> <p>CODE 99 Not stated/Inadequately described</p> <p>'Not stated/Inadequately described' should be used only when the information is not currently available, but is expected to become available as the claim progresses.</p>
