# National Health Performance Authority, Hospital Performance: Patients who received their surgery within clinically recommended times 2012-13

# Identifying and definitional attributes

Metadata item type: Indicator

**Indicator type:** Progress measure

**Short name:** Patients who received their surgery within clinically recommended times 2012-13

METEOR identifier: 532935

Registration status: National Health Performance Authority (retired), Retired 01/07/2016

**Description:** The percentage of patients who received their <u>elective surgery</u> within the clinically

recommended time.

Indicator set: National Health Performance Authority: Hospital performance: 2011-16

National Health Performance Authority (retired), Retired 01/07/2016

# Collection and usage attributes

**Computation description:** The percentage of patients who received <u>elective surgery</u> within the clinically

recommended time.

**Computation:** 100 x (Numerator ÷ Denominator)

Waiting times are calculated for patients whose reason for removal was:

 Admitted as an elective patient for awaited procedure by or on behalf of this hospital or the state/territory or

Admitted as emergency patient for awaited procedure by or on behalf of this hospital or the state/territory

The calculation of waiting time excludes:

 any days the patient was waiting with a less urgent elective surgery urgency category than their urgency category at removal. When a patient's urgency category changes, existing NMDS business rules will apply.

 people who were transferred to another hospital's elective surgery waiting list, were treated elsewhere but not on behalf of the hospital, were not contactable, died prior to receiving their surgery or declined surgery.

For the purposes of reporting, patients are reported as the final urgency category they were when treated.

**Numerator:** Number of patients who received <u>elective surgery</u> within the clinically

recommended time.

#### Comments:

The National Elective Surgery Target commenced in January 2012 with the requirement that 100% of all patients in all urgency categories will receive their surgery within clinically recommended times by 2015 for NSW, VIC, QLD, WA, and SA and by 2016 for TAS, ACT and NT. Each state and territory has a different starting point for each urgency category and, accordingly, a different target for each category for December of each year leading up to 2015 (or 2016). These targets are shown in the Table below.

	NSW	VIC	QLD	WA	SA	TAS	ACT	NT	
URGENCY CATEGORY 1 (%)									
Target period	92.3	100.0	83.0	87.4	87.5	75.4	91.8	79.1	
1 Jan 2012 to 31 Dec 2012	96.0	100.0	89.0	94.0	94.0	84.0	95.0	83.0	
1 Jan 2013 to 31 Dec 2013	100.0	100.0	100.0	100.0	100.0	92.0	97.0	90.0	
1 Jan 2014 to 31 Dec 2014	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	
1 Jan 2015 to 31 Dec 2015	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	
1 Jan 2016 to 31 Dec 2016						100.0	100.0	100.0

Other issues caveats: Waiting time is calculated by states and territories by subtracting the listing date for

care from the removal date, minus any days the patient was not ready for care and/or waiting with a less urgent clinical urgency category than their clinical urgency

category at removal.

There are inconsistencies in application of urgency categories between and within

states and territories which impact on the comparability of results.
