Order—order identifier, X[X(49)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Order identifier
METEOR identifier:	539609
Registration status:	Youth Justice, Standard 15/02/2022
Definition:	An alphanumeric identifier for a legal order or arrangement.
Data Element Concept:	Order—order identifier
Value Domain:	Identifier X[X(49)]

Value domain attributes

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	X[X(49)]
Maximum character length:	50

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Implementation in Data Set Specifications:	Juvenile Justice Charge file cluster Youth Justice, Superseded 23/08/2022

DSS specific information:

For the purposes of the JJ DSS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

This item uniquely identifies each supervised (unsentenced) order. The order identifier links the charge record with an order in the Order file cluster of the JJ NMDS. Each unsentenced supervised order in the Order file should have one or more records in the charge file.

Juvenile Justice Offence file cluster Youth Justice, Superseded 23/08/2022

DSS specific information:

For the purposes of the Juvenile Justice NMDS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

This item uniquely identifies each supervised (sentenced) order. The order identifier links the offence type with an order in the Order file of the JJ NMDS. Each order in the Order file should have one or more records in the Offence file.

[Juvenile Justice Order file cluster](#)
        [Youth Justice](#), Superseded 24/03/2023
DSS specific information:

For the purposes of the Juvenile Justice NMDS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

In the order file, the order identifier will in most cases be unique. However, where a single order specifies multiple types of supervision, for example a blended order that specifies a period in detention followed by a period of community-based supervision, the information relating to each type of supervision will comprise a separate record but the order identifier will remain the same.

In the example below, order #10001 is a blended order that comprises a period in detention from 1/1/08 to 1/6/08 followed by a period in the community from 1/6/08 to 1/12/08. Order #10002 is an unrelated remand order.

Person identifier	Order identifier	Order start date	Order end date	Order type-national	Order end reason	Comment
1	10001	01/01/08	01/06/08	35 (sentenced detention)	completed	blended order part 1
1	10001	01/06/08	01/12/08	31 (sentenced community-based with or without additional mandated requirements)	completed	blended order part 2
1	10002	15/01/09	20/01/09	21 (remand)	completed	unrelated order

Queensland: Don't count detention orders that are followed by a period of supervised release as blended orders.

Business rules

- If the [order identifier](#) matches the order identifier of another record and the person identifiers are the same, the order end date of the first record should equal the order start date of the second record.
- The [order identifier](#) ([charge file](#)) must be in the order file.
- If the [order type](#) ([order file](#)) is an unsentenced order then there must be a record in the charge file with a matching order ID.
- The order identifier ([offence file](#)) must be in the order file.
