

# National Partnership Agreement on Improving Public Hospital Services: Length of stay in emergency department short stay units less than or equal to 24 hours

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Short name:</b>	Length of stay in emergency department short stay units less than or equal to 24 hours
<b>Synonymous names:</b>	Length of stay in an ED short stay unit
<b>METEOR identifier:</b>	545661
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Standard 04/09/2014</li></ul>
<b>Description:</b>	The percentage of patients provided with care in an <a href="#">emergency department short stay unit</a> whose length of stay in the unit is less than or equal to 24 hours.
<b>Indicator set:</b>	<a href="#">Performance Indicators for the National Partnership Agreement on Improving Public Hospital Services</a> <a href="#">Health</a> , Standard 21/11/2013

## Collection and usage attributes

<b>Computation description:</b>	<p>The denominator is calculated using the total number of episodes of admitted patient care assigned an <a href="#">Emergency department short stay unit departure destination</a>, which is a count of the total number of patients that were provided with care in an emergency department short stay unit.</p> <p>Analysis is by state and territory and hospital, based on location of service.</p> <p>Presented as a percentage.</p>
<b>Computation:</b>	$100 \times (\text{Numerator} \div \text{Denominator})$

**Numerator:** The number of episodes of admitted patient care with a length of stay in an emergency department short stay unit less than or equal to 24 hours (i.e. less than or equal to 1,440 minutes).

**Numerator data elements:**

Data Element / Data Set
<a href="#">Episode of admitted patient care—length of stay in emergency department short stay unit, total minutes NNNNN</a>
<b>Data Source</b>
<a href="#">National Hospital Morbidity Database (NHMD)</a>
<b>NMDS / DSS</b>
<a href="#">Admitted patient care NMDS 2014-15</a>

**Denominator:** The number of episodes of admitted patient care where the patient physically departs from an emergency department short stay unit.

**Denominator data elements:**

Data Element / Data Set
<a href="#">Episode of admitted patient care—emergency department short stay unit departure destination, code N</a>
<b>Data Source</b>
<a href="#">National Hospital Morbidity Database (NHMD)</a>
<b>NMDS / DSS</b>
<a href="#">Admitted patient care NMDS 2014-15</a>

**Disaggregation:** Disaggregation is by state/territory and hospital

**Disaggregation data elements:**

Data Element / Data Set
<a href="#">Establishment—organisation identifier (state/territory), NNNNN</a>
<b>Data Source</b>
<a href="#">National Hospital Morbidity Database (NHMD)</a>
<b>NMDS / DSS</b>
<a href="#">Admitted patient care NMDS 2014-15</a>

**Comments:** The scope of this indicator is all hospitals for which the [National Emergency Access Target](#) applies, that is, all hospitals reporting to the Non-admitted patient emergency department care (NAPEDC) NMDS (Peer Groups A, B and other) as at August 2011. The scope has been recommended by the Expert Panel's Review of Elective Surgery and Emergency Access Targets under the National Partnership Agreement on Improving Public Hospital Services (Recommendation 9) and agreed by the Council of Australian Governments in the National Health Reform Agreement - National Partnership Agreement on Improving Public Hospital Services (Clause 5).

## Representational attributes

**Representation class:** Percentage  
**Data type:** Real  
**Unit of measure:** Episode  
**Format:** NN[N].N

## Data source attributes
