Non-admitted patient service event—care type, (derived) code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Care type, derived
Synonymous names:	Care type
METEOR identifier:	548212
Registration status:	Health , Superseded 13/11/2014
Definition:	A descriptor of the overall nature of care delivered during a non-admitted patient service event, derived from other service characteristics, as represented by a code.
Data Element Concept:	Non-admitted patient service event—care type
Value Domain:	Care type code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Rehabilitation care
	2	Palliative care
	3	Geriatric evaluation and management (GEM)
	4	Psychogeriatric care
	5	Mental health care
	8	Other care

Collection and usage attributes

Guide for use:	CODE 1 Rehabilitation care
	Rehabilitation care is care in which the primary clinical purpose or treatment goal is improvement in the functioning of a patient with an impairment, activity limitation or participation restriction due to a health condition. The patient will be capable of actively participating.
	Rehabilitation care is always:
	<ul style="list-style-type: none">delivered under the management of or informed by a clinician with specialised expertise in rehabilitation; andevidenced by an individualised multidisciplinary management plan, which is documented in the patient's medical record, that includes negotiated goals within specified time frames and formal assessment of functional ability.
	CODE 2 Palliative care
	Palliative care is care in which the primary clinical purpose or treatment goal is

optimisation of the quality of life of a patient with an active and advanced life-limiting illness. The patient will have complex physical, psychosocial and/or spiritual needs.

Palliative care is always:

- delivered under the management of or informed by a clinician with specialised expertise in palliative care; and
- evidenced by an individualised multidisciplinary assessment and management plan, which is documented in the patient's medical record, that covers the physical, psychological, emotional, social and spiritual needs of the patient and negotiated goals.

CODE 3 Geriatric evaluation and management (GEM)

Geriatric evaluation and management is care in which the primary clinical purpose or treatment goal is improvement in the functioning of a patient with multi-dimensional needs associated with medical conditions related to ageing, such as tendency to fall, incontinence, reduced mobility and cognitive impairment. The patient may also have complex psychosocial problems.

Geriatric evaluation and management is always:

- delivered under the management of or informed by a clinician with specialised expertise in geriatric evaluation and management; and
- evidenced by an individualised multidisciplinary management plan, which is documented in the patient's medical record that covers the physical, psychological, emotional and social needs of the patient and includes negotiated goals within indicative time frames and formal assessment of functional ability.

CODE 4 Psychogeriatric care

Psychogeriatric care is care in which the primary clinical purpose or treatment goal is improvement in the functional status, behaviour and/or quality of life for an older patient with significant psychiatric or behavioural disturbance, caused by mental illness, an age-related organic brain impairment or a physical condition.

Psychogeriatric care is always:

- delivered under the management of or informed by a clinician with specialised expertise in psychogeriatric care; and
- evidenced by an individualised multidisciplinary management plan, which is documented in the patient's medical record, that covers the physical, psychological, emotional and social needs of the patient and includes negotiated goals within indicative time frames and formal assessment of functional ability.

Psychogeriatric care is not applicable if the primary focus of care is acute symptom control.

CODE 5 Mental health care

Mental health care is care in which the primary clinical purpose or treatment goal is improvement in the symptoms and/or psychosocial, environmental and physical functioning related to a patient's mental disorder.

Mental health care is:

- delivered under the management of, or regularly informed by, a clinician with specialised expertise in mental health;
- evidenced by an individualised formal mental health assessment and the implementation of a documented mental health plan; and
- may include significant psychosocial components, including family and carer support.

CODE 8 Other care

Any care provided that does not fall within the categories above, e.g. maintenance care, and acute care.

Data element attributes

Collection and usage attributes

Guide for use:	<p>Subacute care is specialised multidisciplinary care in which the primary need for care is optimisation of the patient's functioning and quality of life. A person's functioning may relate to their whole body or a body part, the whole person, or the whole person in a social context, and to impairment of a body function or structure, activity limitation and/or participation restriction.</p> <p>Subacute care comprises the defined care types of rehabilitation, palliative care, geriatric evaluation and management (GEM) and psychogeriatric care.</p> <p>A multidisciplinary management plan comprises a series of documented and agreed initiatives or treatments (specifying program goals, actions and timeframes) which has been established through multidisciplinary consultation and consultation with the patient and/or carers.</p> <p>Palliative care episodes can include grief and bereavement support for the family and carers of the patient where it is documented in the patient's medical record.</p>
Collection methods:	<p>Classification depends on an assessment of the overall nature of care provided, based on other service event characteristics collected at the jurisdiction level such as clinic type, provider type and/or referral details. The method used to derive the care type should be submitted with the dataset.</p>
