# Emergency department stay—type of visit to emergency department, code N

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Type of visit to emergency department
METEOR identifier:	550725
Registration status:	<a href="#">Health</a> , Superseded 25/01/2018
Definition:	The reason the patient presents to an <a href="#">emergency department</a> , as represented by a code.
Context:	Emergency department care.

## Data element concept attributes

### Identifying and definitional attributes

Data element concept:	<a href="#">Emergency department stay—type of visit to emergency department</a>
METEOR identifier:	472904
Registration status:	<a href="#">Health</a> , Superseded 20/10/2021 <a href="#">Independent Hospital Pricing Authority</a> , Standard 31/10/2012 <a href="#">National Health Performance Authority (retired)</a> , Retired 01/07/2016 <a href="#">Tasmanian Health</a> , Standard 05/06/2020
Definition:	The reason the patient presents to an emergency department.
Context:	Hospital non-admitted patient care
Object class:	<a href="#">Emergency department stay</a>
Property:	<a href="#">Type of visit to emergency department</a>

## Value domain attributes

### Identifying and definitional attributes

Value domain:	<a href="#">Emergency department visit type code N</a>
METEOR identifier:	550706
Registration status:	<a href="#">Health</a> , Superseded 25/01/2018
Definition:	A code set representing the types of <a href="#">emergency department</a> visits.

## Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N	
<b>Maximum character length:</b>	1	
	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Emergency presentation
	2	Return visit, planned
	3	Pre-arranged admission

## Collection and usage attributes

### Guide for use:

#### CODE 1 Emergency presentation

Where a patient presents to the emergency department for an actual or suspected condition which is sufficiently serious to require acute unscheduled care. This includes patients awaiting transit to another facility who receive clinical care in the emergency department, and patients for whom resuscitation is attempted.

Exclusion: Where patients are awaiting transit to another facility and do not receive clinical care in the emergency department, the patient should not be recorded.

#### CODE 2 Return visit, planned

Where a patient presents to the emergency department for a return visit, as a result of a previous emergency department presentation (Code 1) or return visit (Code 2). The return visit may be for planned follow-up treatment, as a consequence of test results becoming available indicating the need for further treatment, or as a result of a care plan initiated at discharge.

Exclusion: Where a visit follows general advice to return if feeling unwell, this should not be recorded as a planned visit.

#### CODE 3 Pre-arranged admission

Where a patient presents to the emergency department for an admission to either a non-emergency department ward or other admitted patient care unit that has been arranged prior to the patient's arrival, and the patient receives clinical care in the emergency department.

Exclusion: Where a patient presents for a pre-arranged admission and only clerical services are provided by the emergency department, the patient should not be recorded.

#### CODE 5 Dead on arrival

Where a patient is dead on arrival and an emergency department clinician certifies the death of the patient.

Exclusion: Where resuscitation of the patient is attempted, this should be recorded as an emergency presentation (Code 1).

Note: Where Code 5 is recorded for a patient, an [Episode end status](#) Code 7 (Dead on arrival) should also be recorded.

## Data element attributes

### Collection and usage attributes

#### Comments:

Required for analysis of emergency department services.

### Source and reference attributes

#### Submitting organisation:

National Health Information Standards and Statistics Committee

#### Origin:

National Health Data Committee
