Person—potentially treatable death indicator, yes/no code N

Identifying and definitional attributes

| | |
|------------------------------|---|
| Metadata item type: | Data Element |
| Short name: | Potentially treatable death indicator |
| METEOR identifier: | 550825 |
| Registration status: | National Health Performance Authority (retired) , Retired 01/07/2016 |
| Definition: | An indicator of whether a person's cause of death was treatable within the present health system, as represented by a code. |
| Data Element Concept: | Person—potentially treatable death indicator |
| Value Domain: | Yes/no code N |

Value domain attributes

Representational attributes

| | | |
|----------------------------------|--------------|----------------|
| Representation class: | Code | |
| Data type: | Boolean | |
| Format: | N | |
| Maximum character length: | 1 | |
| | Value | Meaning |
| Permissible values: | 1 | Yes |
| | 2 | No |

Source and reference attributes
