Emergency department non-admitted patient service episode end status code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	551280
Registration status:	Health , Superseded 19/11/2015
Definition:	A code set representing the status of a patient at the end of a non-admitted patient emergency department service episode.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Transferred for admitted patient care in this hospital (either short stay unit, hospital-in-the-home or other admitted patient care unit)
	2	Emergency department stay completed - departed without being transferred to a short stay unit, hospital-in-the-home or other admitted patient care unit in this hospital or referred to another hospital
	3	Emergency department stay completed - referred to another hospital for admission
	4	Did not wait to be attended by a health care professional
	5	Left at own risk after being attended by a health care professional but before the non-admitted patient emergency department service episode was completed
	6	Died in emergency department
	7	Dead on arrival

Collection and usage attributes

Guide for use:

CODE 1 Transferred for admitted patient care in this hospital (either short stay unit, hospital-in-the-home or other admitted patient care unit)

This code should only be used for patients who physically depart the emergency department because they are admitted to a short stay unit, hospital-in-the-home or other admitted patient care unit.

Patients for whom the intention is to admit to a short stay unit, hospital-in-the-home or other admitted patient care unit, but who die or otherwise leave the emergency department should not be recorded as Code 1.

This code excludes patients who died in the emergency department. Such instances should be coded to Code 6.

CODE 2 Emergency department stay completed - departed without being transferred to a short stay unit, hospital-in-the-home or other admitted patient care unit in this hospital or referred to another hospital

This code includes patients who either departed under their own care, under police custody, under the care of a residential aged care facility or under the care of another carer.

This code excludes patients who died in the emergency department. Such instances should be coded to Code 6.

CODE 6 Died in emergency department

This code should only be used for patients who die while physically located within the emergency department.

CODE 7 Dead on arrival

This code should only be used for patients who are dead on arrival and an emergency department clinician certifies the death of the patient. This includes where the clinician certifies the death outside the emergency department (e.g. in an ambulance outside the emergency department).

Exclusion: When resuscitation or any other clinical care for the patient is attempted, Code 7 should not be used.

Note: Where Code 7 is recorded for a patient, a [Type of visit to emergency department](#) Code 5 (Dead on arrival) should also be recorded.
