

# Record—identifier, X[X(79)]

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Record identifier (80 character maximum)
<b>Synonymous names:</b>	State record identifier
<b>METEOR identifier:</b>	555463
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Superseded 25/01/2018</li></ul>
<b>Definition:</b>	A record identifier that is unique to the reporting body, as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Record—identifier</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Identifier
<b>Data type:</b>	String
<b>Format:</b>	X[X(79)]
<b>Maximum character length:</b>	80

## Data element attributes

## Source and reference attributes

<b>Submitting organisation:</b>	Australian Institute of Health and Welfare

<b>Implementation in Data Set Specifications:</b>	<a href="#">Admitted patient care NMDS 2014-15 Health</a> , Superseded 13/11/2014
---	---

**Implementation start date:** 01/07/2014

**Implementation end date:** 30/06/2015

***DSS specific information:***

In the context of the Admitted patient care NMDS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data specification, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.

This field cannot be left blank.

**DSS specific information:**

In the context of the Non-admitted patient NBEDS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data set, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.
