Record—identifier, X[X(79)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Record identifier (80 character maximum)
Synonymous names:	State record identifier
METEOR identifier:	555463
Registration status:	Health , Superseded 25/01/2018
Definition:	A record identifier that is unique to the reporting body, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Record—identifier
METEOR identifier:	323306
Registration status:	Community Services (retired) , Standard 27/03/2007 WA Health , Standard 04/03/2014 Disability , Superseded 15/12/2017 Health , Superseded 25/01/2018 Australian Institute of Health and Welfare , Recorded 30/10/2023
Definition:	An identifier for a record.
Object class:	Record
Property:	Identifier

Value domain attributes

Identifying and definitional attributes

Value domain:	Identifier X[X(79)]
METEOR identifier:	555466
Registration status:	Health , Standard 07/03/2014 Independent Hospital Pricing Authority , Standard 16/03/2016 Tasmanian Health , Standard 01/12/2023
Definition:	A logical combination of alphanumeric characters that identify an entity.

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	X[X(79)]
Maximum character length:	80

Data element attributes

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Implementation in Data Set Specifications: [Admitted patient care NMDS 2014-15 Health](#), Superseded 13/11/2014
Implementation start date: 01/07/2014
Implementation end date: 30/06/2015
DSS specific information:

In the context of the Admitted patient care NMDS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data specification, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.

This field cannot be left blank.

DSS specific information:

In the context of the Non-admitted patient NBEDS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data set, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.

This field cannot be left blank.
