

Maternity model of care

Identifying and definitional attributes

Metadata item type: Object Class

METEOR identifier: 558000

Registration status:

- [Health](#), Standard 14/05/2015

Definition: The overarching design of how maternity care is delivered to a woman or women.

This is a multidimensional concept that incorporates attributes of the women being cared for, the type of healthcare providers who provide the care and how and where the care is provided.

Context: Used in maternal and perinatal healthcare settings.

Specialisation of: [Model of care](#)

Source and reference attributes

Submitting organisation: National Perinatal Epidemiology and Statistics Unit

Origin: National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.
