Maternity model of care—target group indicator

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	558047
Registration status:	Health, Standard 14/05/2015
Definition:	An indicator of whether a particular maternity model of care is targeted predominantly at a specific section of the female population who share a common characteristic or set of characteristics.

Object Class attributes

Identifying and definitional attributes

Object class:	Maternity model of care
Definition:	The overarching design of how maternity care is delivered to a woman or women. This is a multidimensional concept that incorporates attributes of the women being cared for, the type of healthcare providers who provide the care and how and where the care is provided.
Context:	Used in maternal and perinatal healthcare settings.
Specialisation of:	Model of care

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.

Property attributes

Identifying and definitional attributes

Property:	Target group indicator
Definition:	An indicator that an entity has been designed so as to be suitable for a specific section of the population who share a common characteristic or set of characteristics.
Property group:	Entry into service event
