

# Maternity model of care— target group indicator, code N

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Target group indicator
<b>METEOR identifier:</b>	558051
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Standard 14/05/2015</li></ul>
<b>Definition:</b>	An indicator of whether a particular maternity model of care is predominantly targeted at a specific section of women who share a common characteristic or set of characteristics, as represented by a code.
<b>Context:</b>	Used in maternal and perinatal healthcare settings.
<b>Data Element Concept:</b>	<a href="#">Maternity model of care—target group indicator</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Code						
<b>Data type:</b>	Boolean						
<b>Format:</b>	N						
<b>Maximum character length:</b>	1						
<b>Permissible values:</b>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Yes</td></tr><tr><td>2</td><td>No</td></tr></tbody></table>	Value	Meaning	1	Yes	2	No
Value	Meaning						
1	Yes						
2	No						

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	<p>Some models of care are designed for specific groups of women based on a set of agreed common criteria and may restrict access to women not meeting this criteria. These restrictions may be based on geographical area, risk factors, ethnic, cultural or social groups or medical or obstetric conditions. In some cases, a model of care may not have any access restrictions but will still predominantly target a particular group of women. In both of these cases a value of "Yes" should be used.</p> <p>If a model of care is available to all women without any restrictions then a value of "No" should be used.</p>
-----------------------	--

**Collection methods:** Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.

## Source and reference attributes
