Maternity model of care—target group indicator, code N

Exported from METEOR (AIHW's Metadata Online Registry)

Maternity model of care—target group indicator, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Target group indicator
METEOR identifier:	558051
Registration status:	Health, Standard 14/05/2015
Definition:	An indicator of whether a particular maternity model of care is predominantly targeted at a specific section of women who share a common characteristic or set of characteristics, as represented by a code.
Context:	Used in maternal and perinatal healthcare settings.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Maternity model of care—target group indicator
METEOR identifier:	558047
Registration status:	Health, Standard 14/05/2015
Definition:	An indicator of whether a particular maternity model of care is targeted predominantly at a specific section of the female population who share a common characteristic or set of characteristics.
Object class:	Maternity model of care
Property:	Target group indicator

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW & NPESU), Maternity Care Classification System subproject.

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no code N
METEOR identifier:	270732
Registration status:	Australian Institute of Health and Welfare, Recorded 09/08/2023 Australian Teacher Workforce Data Oversight Board, Standard 30/08/2022 Community Services (retired), Standard 27/04/2007 Disability, Standard 07/10/2014 Early Childhood, Standard 21/05/2010 Health, Standard 01/03/2005 Homelessness, Standard 23/08/2010 Housing assistance, Standard 23/08/2010 Independent Hospital Pricing Authority, Standard 01/11/2012 Indigenous, Standard 16/09/2014 National Health Performance Authority (retired), Retired 01/07/2016 Tasmanian Health, Standard 27/05/2020 WA Health, Standard 19/03/2015

| | | Definition: | A code set representing 'yes' and 'no'. |

Representational attributes

Representation class:	Code
Data type:	Boolean
Format:	N
Maximum character length:	1

	Value	**Meaning**
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

| **Guide for use:** | Some models of care are designed for specific groups of women based on a set of agreed common criteria and may restrict access to women not meeting this criteria. These restrictions may be based on geographical area, risk factors, ethnic, cultural or social groups or medical or obstetric conditions. In some cases, a model of care may not have any access restrictions but will still predominantly target a particular group of women. In both of these cases a value of "Yes" should be used.

If a model of care is available to all women without any restrictions then a value of "No" should be used. |
|---|---|
| **Collection methods:** | Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced. |
