Specialised mental health service—number of seclusion events, total number N[NNN]

Exported from METEOR (AIHW's Metadata Online Registry)

Specialised mental health service—number of seclusion events, total number N[NNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of seclusion events
METEOR identifier:	558083
Registration status:	Health, Standard 13/11/2014
Definition:	The total number of **seclusion** events occurring within the reference period for a specialised mental health service.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Specialised mental health service—number of seclusion events
METEOR identifier:	558081
Registration status:	Health, Standard 13/11/2014
Definition:	The number of **seclusion** events occurring within the reference period for a specialised mental health service.
Object class:	Specialised mental health service
Property:	Number of seclusion events

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Value domain attributes

Identifying and definitional attributes

Value domain:	Total number N[NNN]
METEOR identifier:	480158
Registration status:	Commonwealth Department of Health, Retired 19/10/2023 Community Services (retired), Standard 10/04/2013 Disability, Standard 13/08/2015 Health, Standard 13/11/2014 Housing assistance, Standard 01/05/2013 Independent Hospital Pricing Authority, Standard 17/10/2017 Indigenous, Standard 16/09/2014
Definition:	The total number.

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNN]
Maximum character length:	4

Value	Meaning

| **Supplementary values:** | 9999 | Not stated/inadequately described |

Data element attributes

Collection and usage attributes

Guide for use:	Any return to seclusion after an initial intervention has ceased is recorded as a new event. The seclusion period is not broken when the consumer leaves the seclusion room to attend to personal hygiene or receive medication, food or fluids and is considered a continuous seclusion event.
Comments:	Reporting of this data element enables reporting of the nationally agreed seclusion key performance indicator *Rate of seclusion*. The rate of seclusion is calculated as the total number of seclusion events divided by the total accrued number of mental health care days provided by the admitted patient care service during the reference period, multiplied by 1,000.

Implementation in Data Set Specifications:	Mental health seclusion and restraint NBEDS 2015-Health, Standard 13/11/2014

Implementation start date: 01/07/2015
DSS specific information:

Data is limited to hospitals that provide acute specialised mental health public hospital services.

The data element Specialised mental health service target population should be used to distinguish between General, Child and adolescent, Youth, Older person and Forensic services for each hospital. Data records for this collection may therefore differ to the Admitted service unit records provided for the Mental health establishments NMDS.

Implementation in Indicators:	**Used as Numerator**
