Maternity model of care—midwifery caseload indicator

Exported from METEOR (AIHW's Metadata Online Registry)

Maternity model of care—midwifery caseload indicator

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	558580
Registration status:	Health, Standard 14/05/2015
Definition:	An indicator of whether a model of maternity care is a **midwifery caseload** model of care.

Object Class attributes

Identifying and definitional attributes

Object class:	Maternity model of care
Definition:	The overarching design of how maternity care is delivered to a woman or women.
	This is a multidimensional concept that incorporates attributes of the women being cared for, the type of healthcare providers who provide the care and how and where the care is provided.
Context:	Used in maternal and perinatal healthcare settings.
Specialisation of:	Model of care

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.

Property attributes

Identifying and definitional attributes

Property:	Midwifery caseload indicator
Definition:	An indicator of whether an entity is a form of care whereby one midwife takes on the primary or lead care role throughout the pregnancy for an agreed number of women per year and acts as a second or "back-up" midwife for women who have another midwife as their primary carer.
Property group:	Labour characteristics
