## Maternity model of care—postnatal visits in a residential setting indicator

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 558727

Registration status: Health, Standard 14/05/2015

**Definition:** An indicator of whether a model of maternity care provides postnatal visits in a

residential setting.

## Object Class attributes

## Identifying and definitional attributes

Object class: Maternity model of care

**Definition:** The overarching design of how maternity care is delivered to a woman or women.

This is a multidimensional concept that incorporates attributes of the women being cared for, the type of healthcare providers who provide the care and how and

where the care is provided.

**Context:** Used in maternal and perinatal healthcare settings.

Specialisation of: Model of care
