Value	Meaning						
1	Yes						
2	No						

## Data element attributes

### Collection and usage attributes

<b>Guide for use:</b>	<p>CODE 1 Yes</p> <p>This code is to be used if a model of maternity care provides women with access to postnatal visits by a maternity care health professional in a residential setting such as the woman's own home, a hotel or hostel. These visits may be provided by the designated maternity carer who has provided care throughout the antenatal and/or intrapartum period or the visits may be provided as part of a "domiciliary" or "early discharge" midwifery home visiting program.</p> <p>CODE 2 No</p> <p>This code is to be used if a model of maternity care does not provide women with postnatal care in a residential setting and postnatal visits are only provided in a hospital, clinicians' private rooms or a community/healthcare facility following discharge from the birth setting.</p>
<b>Collection methods:</b>	Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
