Data element attributes

Collection and usage attributes

Guide for use: Some models of care offer antenatal and/or postnatal care in group sessions, such as the *Centering Pregnancy*® model. Group sessions must include both education and clinical care in a group setting and does not refer to "parenting classes" or "antenatal education classes" only. Group sessions are sessions that consist of two or more women.

CODE 3 Combination of individual and group sessions

Use this code when a model of care offers a combination of individual sessions and group sessions.

Collection methods: Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
