Maternity model of care—type of additional remote or rural service, antenatal/postnatal service code N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Type of additional antenatal/postnatal remote or rural service
METEOR identifier:	558776
Registration status:	Health , Standard 14/05/2015
Definition:	The type of additional rural and remote antenatal/postnatal service provided in a maternity model of care, as represented by a code.
Context:	Used in remote or rural maternal and perinatal healthcare settings.
Data Element Concept:	Maternity model of care—type of additional remote or rural service
Value Domain:	Remote antenatal/postnatal service code N[N]

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N[N]
Maximum character length:	2

	Value	Meaning
Permissible values:	1	Fly-in-fly-out clinicians
	2	Telehealth
	3	Community-based remote-area clinicians
	88	Other
Supplementary values:	99	Not stated/inadequately described

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.

Data element attributes

Collection and usage attributes

Guide for use: Report a permissible value indicating an additional service that is included specifically for remote or rural women in a model of maternity care. These additional services are provided for women who reside at a significant distance from a maternity service.

CODE 1 Fly-in-fly-out clinicians

This may include Medical Specialist Outreach Assistance Program (MSOAP) services or any maternity care clinician (midwife or doctor) who travels to a remote community from a metropolitan centre specifically to provide antenatal/postnatal care.

CODE 2 Telehealth

This code is for any model of care that includes visits with a clinician via telehealth technology.

CODE 3 Community-based remote-area clinicians

This code is for models of care where remote-area nurses, midwives and or doctors provide care to women in their local community.

Collection methods: Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
