# National Healthcare Agreement: PI 30-Elapsed time for aged care services, 2015

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Progress measure
<b>Short name:</b>	PI 30-Elapsed time for aged care services, 2015
<b>METEOR identifier:</b>	559006
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 08/07/2016
<b>Description:</b>	The elapsed time between an Aged Care Assessment Team (ACAT) approval and entry into a residential aged care service or commencement of a Home Care Package.
<b>Indicator set:</b>	<a href="#">National Healthcare Agreement (2015)</a> <a href="#">Health</a> , Superseded 08/07/2016
<b>Outcome area:</b>	<a href="#">Aged Care</a> <a href="#">Health</a> , Standard 07/07/2010
<b>Data quality statement:</b>	<a href="#">National Healthcare Agreement: PI 30-Elapsed time for aged care services, 2015 QS</a> <a href="#">Health</a> , Superseded 08/07/2016

## Collection and usage attributes

<b>Population group age from:</b>	
<b>Computation description:</b>	<p>ACAT approval refers to the approval date of the most recent ACAT assessment prior to admission into residential care or commencement of a Home Care Package.</p> <p>Service type: Residential care - high care; Residential care - low care; Home Care Package - levels 1-2; Home Care Package - levels 3-4.</p> <p>Elapsed time period: within two days or less, seven days or less, less than one month, less than three months, less than nine months.</p> <p>Analysis of Indigenous status is by self-reported indication on the associated last ACAT assessment record made before entry into aged care.</p> <p>Disaggregation by state and territory is based on the location of the aged care service.</p> <p>Disaggregation by remoteness and Socio-Economic Indexes for Areas (SEIFA) is based on the recipient's postcode at time of assessment.</p> <p>Presented as:</p> <ul style="list-style-type: none"><li>percentage of people admitted by length of entry period and service type.</li></ul>
<b>Computation:</b>	100 x (Numerator/Denominator) calculated separately for each service type and elapsed time period.
<b>Numerator:</b>	Number of new aged care recipients who commence a service within elapsed time periods during the financial year.

**Numerator data elements:**

**Data Element / Data Set**

New aged care recipient—ACAT assessment date

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

**Data Element / Data Set**

New aged care recipient—service commencement date

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

**Denominator:**

Total number of new aged care recipients during the financial year.

**Denominator data elements:**

**Data Element / Data Set**

New aged care recipient—ACAT assessment date

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

**Disaggregation:**

2013–14—State and territory, by service type, by:

- Indigenous status
- remoteness (Australian Statistical Geography Standard (ASGS) Remoteness Structure)
- 2011 SEIFA Index of Relative Socio-Economic Disadvantage (IRSD) quintiles

2013–14—Nationally by service type, by 2011 SEIFA IRSD deciles.

Some disaggregations may result in numbers too small for publication.

**Disaggregation data elements:**

**Data Element / Data Set**

New aged care recipient—area of usual residence

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

Used for disaggregation by state/territory, remoteness and SEIFA

**Data Element / Data Set**

New aged care recipient—Indigenous status

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

**Data Element / Data Set**

New aged care recipient—service type

**Guide for use**

Data source type: Administrative by-product data, as provided by the Department of Social Services

**Comments:**

Most recent data available for 2015 National Healthcare Agreement (NHA) performance reporting:

Most recent data available for 2015 National Healthcare Agreement (NHA) performance reporting: 2013-14.

This indicator needs to be interpreted with care. The measure of 'elapsed time' is utilised because the period of time between the ACAT approval and entry into residential aged care or commencement of a Home Care Package may be due to factors which cannot be categorised as 'waiting' time. These include:

- care placement offers that are not accepted
- the availability of alternative community care, informal care and respite services
- variations in care fee regimes that influence client choice of preferred service
- building quality and perceptions about quality of care that influence client choice of preferred service

The measure is most relevant for high residential care recipients as the link between entry to residential care and elapsed time is stronger for high care residents than low care residents or community care packaged recipients. This is due to the urgency for high care residents and the greater number of alternatives for people with ACAT approvals for low care or community aged care packages.

From 1 August 2013, the new Home Care Packages Programme commenced, replacing the previous Community Aged Care Packages (CACP), Extended Aged Care at Home (EACH) and Extended Aged Care at Home Dementia (EACHD) packages. Reporting for Home Care Packages are initially by two broad groups of packages - levels 1-2 and levels 3-4 - due to the relatively very small numbers of initial recipients of Home Care Package levels 1 and 3.

**Representational attributes**

**Representation class:** Percentage

**Data type:** Real

**Unit of measure:** Person

## Accountability attributes

**Reporting requirements:** National Healthcare Agreement

**Organisation responsible for providing data:** Department of Social Services.

**Further data development / collection required:** Specification: Minor work required, the measure needs minor work to meet the intention of the indicator.

Consideration to be given to collect "reason for delayed uptake" where elapsed time is greater than 3 months.
