

# National Healthcare Agreement: PI 01- Proportion of babies born of low birth weight, 2015

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Progress measure
<b>Short name:</b>	PI 01-Proportion of babies born of low birth weight, 2015
<b>METEOR identifier:</b>	559066
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Superseded 08/07/2016</li></ul>
<b>Description:</b>	The incidence of low birthweight among liveborn singleton babies.
<b>Indicator set:</b>	<a href="#">National Healthcare Agreement (2015)</a> <a href="#">Health</a> , Superseded 08/07/2016
<b>Outcome area:</b>	<a href="#">Prevention</a> <a href="#">Health</a> , Standard 07/07/2010
<b>Quality statement:</b>	<a href="#">National Healthcare Agreement: PI 01-Proportion of babies born with low birth weight, 2015 QS</a> Health, Superseded 08/07/2016

## Collection and usage attributes

<b>Computation description:</b>	<p>Low birthweight is defined as less than 2,500 grams.</p> <p>Excludes multiple births and stillbirths.</p> <p>Analysis by state/territory, remoteness and Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socioeconomic Disadvantage (IRSD) is based on usual residence of the mother.</p> <p>Data excludes Australian non-residents, residents of external territories and records where state/territory of residence was not stated.</p> <p>Variability bands are to be calculated for single-year and aggregate years data by state and territory using the method below.</p> <p>Presented as a:</p> <ul style="list-style-type: none"><li>• percentage, and</li><li>• number (for disaggregations by Indigenous status).</li></ul>
---------------------------------	---

**Computation:**  $100 \times (\text{Numerator} \div \text{Denominator})$

Variability bands: to be calculated using the standard method for estimating 95% confidence intervals as follows:

$$CI (CR) = CR \pm 1.96 \times (CR/\sqrt{d})$$

Where d=number of live-born singleton infants.

CI = confidence interval

CR = crude rate (expressed as a percentage)

**Numerator:** Number of low birthweight liveborn singleton infants.

**Numerator data elements:**

**Data Element / Data Set**

[Birth—birth weight, total grams NNNN](#)

**Data Source**

[AIHW National Perinatal Data Collection \(NPDC\)](#)

**NMDS / DSS**

[Perinatal NMDS 2010-2011](#)

**Guide for use**

Data source type: Administrative by-product data

**Data Element / Data Set**

[Birth—birth status, code N](#)

**NMDS / DSS**

[Perinatal NMDS 2010-2011](#)

**Guide for use**

Data source type: Administrative by-product data

**Disaggregation:**

2012—Nationally by:

- remoteness (Australian Statistical Geography Standard (ASGS) Remoteness Structure)
- 2011 Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socioeconomic Disadvantage (IRSD) deciles

2012—State and territory, by:

- Indigenous status of the mother

2010–2012—State and territory, by:

- Indigenous status of the mother

Disaggregation by Indigenous status of the mother is recommended to be reported using three-year combined data for the current reporting period due to the small number of low birth weight infants born to Indigenous mothers each year. Single year data (2012) will be reported for time-series (state/territory by Indigenous status).

**Disaggregation data elements:****Data Element / Data Set**[Person—Indigenous status, code N](#)**Data Source**[AIHW National Perinatal Data Collection \(NPDC\)](#)**NMDS / DSS**[Perinatal NMDS 2010-2011](#)**Guide for use**

Data source type: Administrative by-product data  
 Indigenous status of infants is based on the Indigenous status of the mother

**Data Element / Data Set**[Person—area of usual residence, geographical location code \(ASGC 2007\) NNNNN](#)**Data Source**[AIHW National Perinatal Data Collection \(NPDC\)](#)**NMDS / DSS**[Perinatal NMDS 2010-2011](#)**Guide for use**

Data source type: Administrative by-product data  
 Used for disaggregation by state/territory, remoteness and SEIFA IRSD.  
 Geographic unit used is Statistical Local Area. If data are coded according to ASGC boundaries in another year concordance files are used to map between boundaries.

**Comments:** Most recent data available for 2015 National Healthcare Agreement (NHA) performance reporting: 2012 (calendar year data).

Indigenous: Aggregated data (2010 to 2012) will be reported for the current reporting period (state and territory).

Single year data (2012) will be reported for time-series (state and territory).

Information is included in the National Perinatal Data Collection (NPDC) for all live births and still births of at least 400 grams birthweight or at least 20 weeks gestation.

For 2011 data, the 2011 SEIFA IRSD quintile and decile data were produced using the Australian Standard Geography Classification geographical unit of Statistical Local Area. For 2012 data, the 2011 SEIFA IRSD quintile and decile data will be produced using the Australian Statistical Geography Standard geographical unit of Statistical Area 2.

## Representational attributes

**Representation class:** Percentage

**Data type:** Real

**Unit of measure:** Person

**Format:** N[NN.NN]

## Indicator conceptual framework

**Framework and dimensions:** [Community and socioeconomic](#)

## Data source attributes

**Data sources:** **Data Source**

[AIHW National Perinatal Data Collection \(NPDC\)](#)

**Frequency**

Calendar years ending 31 December each year

**Data custodian**

Australian Institute of Health and Welfare

## Accountability attributes

**Reporting requirements:** National Healthcare Agreement

**Organisation responsible for providing data:** Australian Institute of Health and Welfare

**Further data development / collection required:** Specification: Final, the measure meets the intention of the indicator.
