

# Cancer treatment—chemotherapy completion date, DDMMYYYY

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Chemotherapy completion date
<b>METEOR identifier:</b>	561215
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Standard 08/05/2014</li></ul>
<b>Definition:</b>	The completion date of <a href="#">chemotherapy</a> administered during treatment for cancer, expressed as DDMMYYYY.
<b>Data Element Concept:</b>	<a href="#">Cancer treatment—chemotherapy completion date</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Date
<b>Data type:</b>	Date/Time
<b>Format:</b>	DDMMYYYY
<b>Maximum character length:</b>	8

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	<p>Chemotherapy is cancer treatment that achieves its antitumour effect through the use of antineoplastic drugs that inhibit the reproduction of cancer cells by interfering with DNA synthesis and mitosis.</p> <p>The completion date of chemotherapy is the date the last dose was administered during the course of treatment.</p> <p>The completion date of chemotherapy is recorded regardless of whether the course of treatment is completed as intended, and regardless of the intent or timing of the chemotherapy.</p> <p>Multiple entries are not permitted.</p> <p>Dates relating to targeted therapies using a chemotherapy agent are included. Targeted therapies are treatments that use drugs or other substances to identify and attack specific cancer cells.</p> <p>Dates of surgery, radiotherapy and other systemic treatments are collected as separate items. However, if a patient receives treatment with a protocol that includes different types of systemic therapy agents, for example, a chemotherapy agent and a hormone therapy agent, record the completion date of treatment in both relevant data items.</p>
<b>Collection methods:</b>	The information should be obtained from the patient's medical record.
<b>Comments:</b>	Collecting the start and finish dates for treatment modalities will enable an estimate of treatment duration.
