Implementation in Data Set Specifications:

[Bowel cancer diagnostic assessment clusterHealth](#), Superseded 06/09/2018

DSS specific information:

The level of sedation used should comply with ANZCA standards (ANZCA 2010). The level of sedation used should generally be related to the risk of complications for each individual patient as documented in the pre-procedure patient assessment. Further, deep sedation and general anaesthesia may only be used in the presence of an anaesthetist or other appropriately trained and credentialed medical specialist within his/her scope of practice. Nonanaesthetist medical staff require adequate training in the safe and correct usage of sedation equipment and drugs, and in the management and monitoring of sedated patients in accordance with the guidelines.
