Object Class attributes

Identifying and definitional attributes

Object class: [Cancer staging](#)
Definition: System of determining the extent or stage of cancer.
Specialisation of: [Service/care event](#)

Property attributes

Identifying and definitional attributes

Property: [Date of cancer staging](#)
Definition: The date on which cancer staging is completed.

Cancer staging is a system of determining the extent or stage of cancer. This date should be equal to the date that the latest pathological or clinical testing required to determine staging occurred. Should the staging be based on surgical findings the date should be equal to the date of the relevant surgery.
