Person—disease screening invitation round count, total number N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Disease screening invitation round count
METEOR identifier:	568644
Registration status:	Health , Standard 29/08/2014
Definition:	A count of times a person has been invited to participate in a disease screening program, as represented by a number.
Data Element Concept:	Person—disease screening invitation round count
Value Domain:	Total number N[N]

Value domain attributes

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	N[N]	
Maximum character length:	2	
	Value	Meaning
Supplementary values:	99	Not stated/inadequately described

Data element attributes

Collection and usage attributes

Guide for use:	A person will receive multiple invites to participate in disease screening over a number of years when they are in the target age group. This data element records a count of the number of times a person has been invited to participate. For example, in the National Bowel Cancer Screening Program (NBCSP) a person will be invited to participate at age 50, 55, 60 and 65.
