Value	Meaning												
0	No problems within the period stated												
1	Minor problem requiring no action												
2	Mild problem but definitely present												
3	Moderately severe problem												
4	Severe to very severe problem												

Collection and usage attributes

Guide for use: The Health of the Nation Outcome Scale (HoNOS) is used to rate adult mental health service users. Together, the scales rate various aspects of mental and social health.

HoNOS is answered on an item-specific anchored 4-point scale with higher scores indicating more problems. Each scale is assigned a value of between 0 and 4. The twelve scales are as follows:

- Behavioural disturbance
- Non-accidental self injury
- Problem drinking or drug use
- Cognitive problems
- Problems related to physical illness or disability
- Problems associated with hallucinations and delusions
- Problems associated with depressive symptoms
- Other mental and behavioural problems
- Problems with social or supportive relationships
- Problems with activities of daily living
- Overall problems with living conditions
- Problems with work and leisure activities and the quality of the daytime environment

The sum of the individual scores of each of the scales represents the total HoNOS score. The total HoNOS score ranges from 0 to 48, and represents the overall severity of an individual's psychiatric symptoms.
