Episode of care—mental health care phase, code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Mental health care phase

METEOR identifier: 575244

Registration status: Independent Hospital Pricing Authority, Standard 15/10/2014

Definition: The primary goal of treatment within the episode of care in terms of the recognised

phases of mental health care, as represented by a code.

Data Element Concept: Episode of care—mental health care phase

Value Domain: Mental health care phase code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

	Value	Meaning
Permissible values:	1	Acute
	2	Functional gain
	3	Intensive extended
	4	Consolidating gain
	5	Initial assessment
Supplementary values:	9	Not reported

Collection and usage attributes

Guide for use:

The primary goal of care that is reflected in the patient's mental health treatment plan.

It reflects a prospective assessment of the primary goal of care at the time of collection, rather than a retrospective assessment.

CODE 1 Acute

The primary goal of care is the short term reduction in severity of symptoms and/or personal distress associated with the recent onset or exacerbation of a psychiatric disorder.

CODE 2 Functional gain

The primary goal of care is to improve personal, social or occupational functioning or promote psychosocial adaptation in a patient with impairment arising from a psychiatric disorder.

CODE 3 Intensive extended

The primary goal of care is prevention or minimisation of further deterioration, and reduction of risk of harm in a patient who has a stable pattern of severe symptoms, frequent relapses or severe inability to function independently and is judged to require care over an indefinite period.

CODE 4 Consolidating gain

The primary goal of care is to maintain the level of functioning, or improving functioning during a period of recovery, minimise deterioration or prevent relapse where the patient has stabilised and functions relatively independently. Consolidating gain may also be known as maintenance.

CODE 5 Initial assessment

The primary goal of care is to obtain information, including collateral information where possible, in order to determine the intervention/treatment needs and to arrange for this to occur (includes brief history, risk assessment, referral to treating team or other service).
