Collection and usage attributes

Guide for use:

An episode of care starts at admission into a residential treatment/rehabilitation program and ends at discharge from residential care.

An episode of care is not determined by the length of time spent in residential care. No matter how long the client stays in residential care it is only counted as one episode of care. If a client is discharged and later comes back into residential care, this is considered to be a separate episode of care.

Excludes:

- sobering-up/residential respite/short term programs
- clients who did not receive formal treatment and/or rehabilitation such as housing clients.

Collection methods:

If figures are not available for the full year, an estimate can be made based on a representative part of the year.
