Data element attributes

Collection and usage attributes

Guide for use: These additional antenatal/postnatal services are particularly for women in remote or rural areas who reside at a significant distance from a maternity service.

Collection methods: Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.

Source and reference attributes

Submitting organisation: National Perinatal Epidemiology and Statistics Unit

Origin: National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.
