Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use:	These additional antenatal/postnatal services are particularly for women in remote or rural areas who reside at a significant distance from a maternity service.
Collection methods:	Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.

Source and reference attributes

Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.
