

Late effect

Identifying and definitional attributes

Metadata item type: Glossary Item

METEOR identifier: 580923

Registration status:

- [Health](#), Standard 04/02/2015

Definition: A persistent complication, disability or adverse outcome that appears after the acute stage of a disease has resolved (excluding a recurrence or progression of disease). This may be as a result of the treatment, the disease process, or both.

Examples of late effects are infertility, hyperthyroidism, fatigue, scoliosis and cognitive impairment.
