# Service Agreement - Department of Health and Human Services Tasmania: 2014, Percentage of triage 2 emergency department presentations seen within the recommended triage time, 2014

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Short name:</b>	Triage 2 emergency department patients seen within national benchmarks (percentage)
<b>METEOR identifier:</b>	581474
<b>Registration status:</b>	<a href="#">Tasmanian Health</a> , Superseded 09/12/2016
<b>Description:</b>	This indicator measures the percentage of patients that are treated within the national recommended benchmark for waiting times for triage category 2 in public hospital emergency departments.
<b>Indicator set:</b>	<a href="#">Service Agreement - Department of Health and Human Services Tasmania: 2014</a> <a href="#">Tasmanian Health</a> , Superseded 12/12/2016
<b>Outcome area:</b>	<a href="#">Emergency Department access</a> <a href="#">Tasmanian Health</a> , Standard 07/12/2016

## Collection and usage attributes

<b>Computation description:</b>	<p>The definitions applied are consistent with the national definitions used for reporting against the National Partnership Agreement on Hospital and Health Workforce Reform. The definitions include presentations that have been assigned a triage category between 1 and 5. Presentations that are ‘did not wait’, ‘dead on arrival’ or the waiting time to service delivery is invalid are excluded for the purpose of calculating this indicator. See Australasian Triage Scale from the Australasian College for Emergency Medicine for a description of each triage category, including indicative clinical descriptors.</p> <p>Time to treatment is calculated by subtracting the date and time the patient presented to the emergency department from the date and time treatment commenced. The time to treatment is then compared to the recommended treatment time for the allocated initial triage category.</p> <p>The indicator is calculated for triage category 2 and presented as a percentage.</p>				
<b>Computation:</b>	$100 \times (\text{Numerator} \div \text{Denominator})$ <p>Calculated separately for each triage category.</p>				
<b>Numerator:</b>	<p>Total number of presentations to emergency departments that were treated within benchmarks for triage category 2:</p> <ul style="list-style-type: none"><li>• Triage category 2: seen within 10 minutes (being a waiting time of 10 or below, which allows for 10:59 seconds*).</li></ul> <p>* This is in line with the national reporting standards.</p>
