

# National Health Performance Authority Healthy Communities: Infant mortality rate, 2010–2012

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Short name:</b>	Infant (aged less than 1 year) mortality rate, 2010–2012
<b>METEOR identifier:</b>	583497
<b>Registration status:</b>	<ul style="list-style-type: none"><li><a href="#">National Health Performance Authority (retired)</a>, Retired 01/07/2016</li></ul>
<b>Description:</b>	Number of deaths among infants aged less than 1 year per 1,000 live births.
<b>Indicator set:</b>	<a href="#">National Health Performance Authority: Healthy Communities: 2011–National Health Performance Authority (retired)</a> , Retired 01/07/2016

## Collection and usage attributes

<b>Population group age from:</b>	Less than 1 year of age
<b>Population group age to:</b>	Less than 1 year of age
<b>Computation description:</b>	Number of deaths among infants who die before their first birthday per 1,000 live births.

<b>Computation:</b>	$(\text{Numerator} \div \text{Denominator}) \times 1,000$
<b>Numerator:</b>	Number of deaths among infants aged less than 1 year

**Numerator data elements:**

### Data Element / Data Set

[Person—age, total years N\[NN\]](#)

#### Data Source

[ABS Death Registrations Collection](#)

#### Guide for use

Data source type: Administrative by-product data

Include infants aged less than 1 year only, i.e. value = 0.

<b>Denominator:</b>	Number of live births
---------------------	-----------------------

**Denominator data elements:**

### Data Element / Data Set

[Birth—birth status, code N](#)

#### Data Source

[ABS birth registration data](#)

#### Guide for use

Data source type: Administrative by-product data

Used as the main component of the denominator for the infant mortality rate. Include live births only, i.e. value = 1.

**Disaggregation:**

By Medicare Local catchment, which is derived from [Address—statistical area, level 2 \(SA2\) code \(ASGS 2011\) N\(9\)](#), and by [Medicare Local peer group](#).

Medicare Locals plan and fund health services in communities across Australia. They help to ensure patients can access the care they need, particularly when a variety of health workers are involved in providing treatments. A Medicare Local catchment refers to the geographic area of a Medical Local (see [Administrative health region—Medicare Local identifier, code AANN](#))

Medicare Local peer groups are the grouping of the 61 Medicare Locals into seven peer groups, which allows Medicare Locals to be compared to other Medicare Locals with similar characteristics, and to the average for their peer group (see [Administrative health region—Medicare Local peer group, code N](#)). This grouping was undertaken by the National Health Performance Authority using statistical cluster analysis of 2006 Census based socioeconomic status for each Medicare Local and, 2006 Census based Remoteness Area categories (ABS cat. no. 2039.0). Additional information on the average distance to the closest large city and major hospital (A1 public hospital peer group classification, 2010–11) contributed to the assignment of Medicare Locals to peer groups. Groupings were tested for face validity with a stakeholder group. The National Health Performance Authority has created 7 peer groups: Metro 1 to 3, Regional 1 and 2 and Rural 1 and 2. See [Healthy Communities: Australians' experiences with primary health care in 2010–11, Technical Supplement](#) for more information.

**Disaggregation data elements:****Data Element / Data Set**

[Address—statistical area, level 2 \(SA2\) code \(ASGS 2011\) N\(9\)](#)

**Guide for use**

Data source type: Administrative by-product data

Used for disaggregation by Medicare Local catchment.

Deaths are attributed to the Medicare Local catchment in which the infant usually resided, irrespective of where they died.

Births are attributed to the Medicare Local catchment of usual residence of the mother, irrespective of where the birth occurred.

**Data Element / Data Set**

[Administrative health region—Medicare Local identifier, code AANN](#)

**Data Element / Data Set**

[Administrative health region—Medicare Local peer group, code N](#)

**Representational attributes**

<b>Representation class:</b>	Rate
<b>Data type:</b>	Real
<b>Unit of measure:</b>	Life event (e.g. birth, death)
<b>Format:</b>	N[NN].N

**Indicator conceptual framework**

**Framework and dimensions:**

[PAF-Effectiveness](#)

- [PAF-Appropriateness](#)
- [PAF-Effectiveness of access](#)
- [PAF-Quality](#)
  - [PAF-Capability](#)
  - [PAF-Continuity](#)
  - [PAF-Responsiveness](#)
  - [PAF-Safety](#)
- [PAF-Sustainability](#)

## Data source attributes
