Public hospital service research activities cluster

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 583822

Registration status: [Independent Hospital Pricing Authority](#), Superseded 27/11/2017

DSS type: Data Element Cluster

Scope: These data elements are used in conjunction with each other to describe research activity through a combination of research outputs and infrastructure within an establishment.

Research refers to the activities undertaken in a public health service where the primary objective is the advancement of knowledge that ultimately aims to improve consumer and patient health outcomes and/or health system performance. The activity must be undertaken in a structured and ethical way, be formally approved by a research governance or ethics body, and have potential for application outside of the health service in which the activity is undertaken.

For activity based funding purposes, the definition of research relates to the public health service's contribution to maintain research capability, excluding the costs of research activities that are funded from a source other than the state or territory or provided in kind.

Collection and usage attributes

Guide for use: The Public hospital service research activities cluster comprises three data elements that provide information on research capability and activity within a public hospital.

The Public hospital service research activities cluster describes the following information for a public hospital:

Research activity	Count
Full-time equivalent research directorate staff	N[NNN{.N}]
Number of peer reviewed articles published	N[NNN]
Number of approved research projects	N[NNN]

Source and reference attributes

Submitting organisation: Independent Hospital Pricing Authority

Relational attributes

Related metadata references: Has been superseded by [Public hospital service research activities cluster Health](#), Superseded 05/02/2021
