Establishment—number of individual session non-admitted patient service events, total service events N[NNNNNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of individual session non-admitted patient service events
METEOR identifier:	584038
Registration status:	Health , Superseded 25/01/2018
Definition:	The total number of non-admitted patient service events provided as individual sessions to non-admitted patients in an establishment.
Data Element Concept:	Establishment—number of individual session non-admitted patient service events
Value Domain:	Total service events N[NNNNNN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNNNN]
Maximum character length:	7
Unit of measure:	Service event

Data element attributes

Collection and usage attributes

Guide for use:	<p>A non-admitted service which meets the criteria of a non-admitted patient service event should be counted only once, regardless of the number of health care providers present.</p> <p>An individual non-admitted patient service event is one where care was delivered to one patient by one or more health care providers. For example:</p> <ul style="list-style-type: none">• A health care provider working one on one with several different patients in the same space over the same period of time, but each patient is following their own personalised program (such as several patients scheduled to use the physiotherapy gym concurrently).• Multiple family members and a patient meeting with the health care provider to discuss the one patient only.
