Establishment—number of group session non-admitted patient service events

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	584054
Registration status:	Health , Superseded 25/01/2018
Definition:	The number of group session non-admitted patient service events provided by an establishment.
Context:	Required to adequately describe the services provided to non-admitted patients. The resources required to provide services to groups of patients are different from those required to provide services to an equivalent number of individuals. Hence services to groups of non-admitted patients should be counted separately from services to individuals.

Object Class attributes

Identifying and definitional attributes

Object class:	Establishment
Definition:	Institutions, organisations or the community from which health services are provided. The term establishment covers conventional health establishments and also organisations which may provide services in the community.
Specialisation of:	Organisation

Source and reference attributes

Origin:	National Health Data Committee
----------------	--------------------------------

Property attributes

Identifying and definitional attributes

Property:	Number of group session non-admitted patient service events
Definition:	A count of non-admitted patient service events provided as a group session.
Property group:	Service provision event

Source and reference attributes

Submitting organisation:	Independent Hospital Pricing Authority
---------------------------------	--

Data element concept attributes

Collection and usage attributes

Guide for use:	A group is defined as two or more patients receiving a service together.
