Tier II-Determinants of Health

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584850

Description: Are the factors determining health changing for the better? Is it the same for

everyone? Where and for whom are they changing for the worse?

Dimensions of this framework

Community Capacity

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584855

Description: Characteristics of communities and families such as population density, age

distribution, health literacy, housing, community support services and

transport

Environmental Factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584858

Description: Physical, chemical and biological factors such as air, water, food and soil

quality resulting from chemical pollution and waste disposal

Health Behaviours

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584854

Description: Attitudes, beliefs knowledge and behaviours (e.g. patterns of eating, physical

activity, excess alcohol consumption and smoking)

Person-related Factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584851

Description: Genetic-related susceptibility to disease and other factors such as blood

pressure, cholesterol levels and body weight

Socioeconomic Factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 584857

Description: Socio-economic factors such as education, employment, per capita

expenditure on health, and average weekly earnings
