

ABS Australian Health Survey (AHS), 2011–13 (2011–12 National Health Measures Survey component)

Identifying and definitional attributes

Item type: Data Source

Description: In 2011–13, the AHS incorporated the first biomedical collection, the National Health Measures Survey (NHMS). It involved the collection of a range of blood and urine tests from over 11,000 participants aged 5 years and over across Australia.

Information available from this survey includes biomarkers of chronic disease, including diabetes, cardiovascular disease and kidney disease, and nutrient biomarkers, including iron, folate, iodine and vitamin B12.
