Episode of care—principal diagnosis, code (ICD-10-AM 9th edn) ANN{.N[N]}

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Principal diagnosis—episode of care

METEOR identifier: 588987

Registration status: • Health, Superseded 05/10/2016

• Independent Hospital Pricing Authority, Standard 16/03/2016

• Tasmanian Health, Superseded 10/07/2017

Definition: The diagnosis established after study to be chiefly responsible for occasioning an

episode of admitted patient care, an episode of residential care or an attendance

at the health care establishment, as represented by a code.

Data Element Concept: Episode of care—principal diagnosis

Value domain attributes

Representational attributes

Classification scheme: International Statistical Classification of Diseases and Related Health Problems,

Tenth Revision, Australian Modification 9th edition

Representation class: Code

Data type: String

Format: ANN{.N[N]}

Maximum character length: 6

Data element attributes

Collection and usage attributes

Guide for use: The principal diagnosis must be determined in accordance with the Australian

Coding Standards. Each episode of admitted patient care must have a principal diagnosis and may have additional diagnoses. The diagnosis can include a disease, condition, injury, poisoning, sign, symptom, abnormal finding, complaint,

or other factor influencing health status.

As a minimum requirement the Principal diagnosis code must be a valid code from

the current edition of ICD-10-AM.

For episodes of admitted patient care, some diagnosis codes are too imprecise or inappropriate to be acceptable as a principal diagnosis and will group to an error

DRG in the Australian Refined Diagnosis Related Groups.

Diagnosis codes starting with a V, W, X or Y, describing the circumstances that cause an injury, rather than the nature of the injury, cannot be used as principal diagnosis. Diagnosis codes which are morphology codes cannot be used as

principal diagnosis.

Collection methods: A principal diagnosis should be recorded and coded upon <u>separation</u>, for each

episode of admitted patient care or episode of residential care or attendance at a health care establishment. The principal diagnosis is derived from and must be

substantiated by clinical documentation.

Comments:

The principal diagnosis is one of the most valuable health data elements. It is used for epidemiological research, casemix studies and planning purposes.

Implementation in Data Set Specifications:

Activity based funding: Mental health care DSS 2016-17Independent Hospital Pricing Authority, Superseded 28/02/2017

Implementation start date: 01/07/2016
Implementation end date: 30/06/2017

DSS specific information:

For admitted episodes of care it is mandatory for diagnosis to be reported in accordance with the Australian Coding Standards, and in ICD-10-AM 9th edition.

For ambulatory episodes of care, the diagnosis reported is the finalised diagnosis for the episode of care. A provisional diagnosis should only be reported if a finalised diagnosis cannot be obtained. It is mandatory for an ambulatory episode of care principal diagnosis to be reported in ICD-10-AM 9th edition.

For residential episodes of care, the principal diagnosis is reported in accordance with the Residential mental health care national minimum data set. It is mandatory for the principal diagnosis to be reported in ICD-10-AM 8th or 9th edition.

Admitted patient care NMDS 2015-16Health, Superseded 10/11/2015

Implementation start date: 01/07/2015

Implementation end date: 30/06/2016

Conditional obligation:

The principal diagnosis is a major determinant in the classification of Australian Refined Diagnosis Related Groups and Major Diagnostic Categories.

Where the principal diagnosis is recorded prior to discharge (as in the annual census of public psychiatric hospital patients), it is the current provisional principal diagnosis. Only use the admission diagnosis when no other diagnostic information is available. The current provisional diagnosis may be the same as the admission diagnosis.

Admitted patient care NMDS 2016-17Health, Superseded 05/10/2016
