Indigenous primary health care: PI11b-Proportion of regular clients who gave birth within the previous 12 months with a smoking status of 'current smoker', 'ex-smoker' or 'never smoked', 2015

Exported from METEOR (AIHW's Metadata Online Registry)

Indigenous primary health care: PI11b-Proportion of regular clients who gave birth within the previous 12 months with a smoking status of 'current smoker', 'ex-smoker' or 'never smoked', 2015

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI11b-Proportion of regular clients who gave birth within the previous 12 months with a smoking status of 'current smoker', 'ex-smoker' or 'never smoked', 2015
METEOR identifier:	589037
Registration status:	Health, Superseded 05/10/2016 Indigenous, Superseded 20/01/2017
Description:	Proportion of regular clients who are Indigenous, aged 15 years and over, who gave birth within the previous 12 months and whose smoking status has been recorded as one of the following: • current smoker, • ex-smoker, or • never smoked.
Rationale:	Smoking during pregnancy is a risk factor for adverse events in pregnancy, and can be associated with low birth weight, pre-term birth, fetal growth restriction, congenital abnormalities and perinatal death. Low birth weight infants are at a greater risk of dying during the first year of life and are prone to ill health in childhood. Smoking during pregnancy is also associated with increased risk of spontaneous abortion and ectopic pregnancy.
Indicator set:	Indigenous primary health care key performance indicators (2015) Health, Superseded 05/10/2016 Indigenous, Superseded 20/01/2017

Collection and usage attributes

Population group age from:	15 years
Computation description:	Proportion of regular clients who are Indigenous, aged 15 years and over, who gave birth within the previous 12 months and whose smoking status has been recorded as one of the following: • current smoker, • ex-smoker, or • never smoked. 'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years. Presented as a percentage.
Computation:	(Numerator ÷ Denominator) x 100

Numerator: Calculation A: Number of regular clients who are Indigenous, aged 15 years and over, who gave birth within the previous 12 months and whose smoking status has been recorded as 'current smoker'.

Calculation B: Number of regular clients who are Indigenous, aged 15 years and over, who gave birth within the previous 12 months and whose smoking status has been recorded as 'ex-smoker'.

Calculation C: Number of regular clients who are Indigenous, aged 15 years and over, who gave birth within the previous 12 months and whose smoking status has been recorded as 'never smoked'.
