Indigenous primary health care: PI13b-Proportion of regular clients who had their first antenatal care visit within specified periods, 2015

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Indicator

Short name: PI13b-Proportion of Indigenous regular clients who had their first antenatal care visit within specified periods, 2015

METEOR identifier: 589049

Registration status: Health, Superseded 05/10/2016
Indigenous, Superseded 20/01/2017

Description: Proportion of regular clients who are Indigenous, who gave birth within the previous 12 months and who had gestational age recorded at their first **antenatal care visit** with results either:

- less than 13/40 weeks;
- 13/40 weeks to less than 20/40 weeks;
- at or after 20/40 weeks or;
- no result.

Rationale: The primary care needs of all Australians are met effectively through timely and quality care in the community. Good antenatal care is associated with positive health outcomes for mothers and babies.

Indicator set: Indigenous primary health care key performance indicators (2015)
Health, Superseded 05/10/2016
Indigenous, Superseded 20/01/2017

Collection and usage attributes

Computation description: Proportion of regular clients who are Indigenous, who gave birth within the previous 12 months and who had gestational age recorded at their first **antenatal care visit** with results either:

- less than 13/40 weeks;
- 13/40 weeks to less than 20/40 weeks;
- at or after 20/40 weeks or;
- no result.

'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years.

'Birth' includes live births and still births if the birthweight was at least 400 grams or the gestational age was 20 weeks or more.

'Previous 12 months' refers to either the previous financial year or the previous calendar year.

Presented as a percentage.

Calculated separately for each gestational age range.

Computation: (Numerator ÷ Denominator) x 100

Numerator:

Calculation A: Number of regular clients who are Indigenous, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results less than 13/40 weeks.

Calculation B: Number of regular clients who are Indigenous, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results at or after 13/40 weeks and less than 20/40 weeks.

Calculation C: Number of regular clients who are Indigenous, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results at or after 20/40 weeks.

Calculation D: Number of regular clients who are Indigenous, who gave birth within the previous 12 months and who did not have gestational age recorded at their first antenatal care visit.
