Indigenous primary health care: PI18b-Proportion of regular clients with a selected chronic disease who have had a kidney function test, 2015

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI18b-Proportion of regular clients with a selected chronic disease who have had a kidney function test, 2015
METEOR identifier:	589069
Registration status:	<u>Health</u> , Superseded 05/10/2016 <u>Indigenous</u> , Superseded 20/01/2017
Description:	Proportion of regular clients who are Indigenous, aged 15 years and over, are recorded as having a selected chronic disease and have had a kidney function test.
Indicator set:	Indigenous primary health care key performance indicators (2015) Health, Superseded 05/10/2016 Indigenous, Superseded 20/01/2017

Collection and usage attributes

Population group age from:	15 years
Computation description:	Proportion of regular clients who are Indigenous, aged 15 years and over who are recorded as having Type II diabetes and have had an estimated glomerular filtration rate (eGFR) recorded AND/OR an albumin/creatinine ratio (ACR) or other micro albumin test result recorded within the previous 12 months AND proportion of regular clients who are Indigenous, aged 15 years and over who are recorded as having cardiovascular disease (CVD) and have had an eGFR recorded within the previous 12 months.
	'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years.
	A client is recorded as having Type II diabetes or CVD if on the clinical record the service has recorded a condition or condition code that the system considers to be Type II diabetes or CVD.
	Calculated separately for Type II diabetes and CVD.
	Presented as a percentage.
Computation:	(Numerator ÷ Denominator) x 100
Numerator:	Calculation A: Number of regular clients who are Indigenous, aged 15 years and over, are recorded as having Type II diabetes and have had an eGFR AND/OR an ACR or other micro albumin test result recorded within the previous 12 months.
	Calculation B: Number of regular clients who are Indigenous, aged 15 years and over, are recorded as having CVD and have had an eGFR recorded within the previous 12 months.
Numerator data elements:	Data Element / Data Set
	Person-diabetes mellitus status, code NN
