Indigenous primary health care: Pl23a-Number of regular clients with Type II diabetes who have had a blood pressure measurement result recorded, 2015

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Output measure

Short name: Pl23a-Number of regular clients with Type II diabetes who have had a blood

pressure measurement result recorded, 2015

METEOR identifier: 589079

Registration status: Health, Superseded 05/10/2016

Indigenous, Superseded 20/01/2017

Description: Number of regular clients who are Indigenous, have Type II diabetes and who have

had a blood pressure measurement result recorded at the primary health care

service within the previous 6 months.

Rationale: For Indigenous people with Type II diabetes, monitoring blood pressure can help

assure appropriate medical care to lower the risk of macrovascular (stroke, heart attack and heart failure) and microvascular (kidney disease, eye disease and

peripheral neuropathy) complications.

Indicator set: Indigenous primary health care key performance indicators (2015)

Health, Superseded 05/10/2016 Indigenous, Superseded 20/01/2017

Collection and usage attributes

Computation description: Count of regular clients who are Indigenous, have Type II diabetes and who have

had a blood pressure measurement result recorded at the primary health care

service within the previous 6 months.

'Regular client' refers to a client of an OATSIH-funded primary health care service

(that is required to report against the Indigenous primary health care key

performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2

years.

Exclude Type I diabetes, secondary diabetes, gestational diabetes mellitus (GDM),

previous GDM, impaired fasting glucose, impaired glucose tolerance.

Results arising from measurements conducted outside of the service, that are

known by the service, are included in the calculation of this indicator.

Presented as a number.

Computation: Numerator only

Numerator: Number of regular clients who are Indigenous, have Type II diabetes and who have

had a blood pressure measurement result recorded at the primary health care

service within the previous 6 months.
