

National Healthcare Agreement: PI 24–Survival of people diagnosed with notifiable cancers, 2016

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 24–Survival of people diagnosed with cancers, 2016
METEOR identifier:	598730
Registration status:	<ul style="list-style-type: none">• Health, Superseded 31/01/2017
Description:	Five-year relative survival proportions for people diagnosed with cancer.
Indicator set:	National Healthcare Agreement (2016) Health , Superseded 31/01/2017
Outcome area:	Hospital and Related Care National Health Performance Authority (retired) , Retired 01/07/2016 Health , Standard 07/07/2010

Collection and usage attributes

Computation description:	<p>The probability of surviving five years in people with cancer is divided by the probability of surviving five years in the general population (matched on age, sex and calendar year).</p> <p>Analysis will be undertaken using the 'period' method of calculation. See Cancer survival and prevalence in Australia: period estimates from 1982 to 2010 (2012 Cancer Series no. 69. Cat. No. 65).</p> <p>Analyses by state and territory, remoteness and Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socioeconomic Disadvantage (IRSD) are based on usual residence of person at diagnosis.</p> <p>Presented as a percentage.</p>
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Probability of surviving for five years in the people diagnosed with cancer.

Numerator data elements:
