Value	Meaning																		
ACT	Australian Capital Territory																		
NSW	New South Wales																		
VIC	Victoria																		
QLD	Queensland																		
SA	South Australia																		
WA	Western Australia																		
TAS	Tasmania																		
NT	Northern Territory																		
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>UNK</td><td>Unknown</td></tr></tbody></table>	Value	Meaning	UNK	Unknown														
Value	Meaning																		
UNK	Unknown																		

Collection and usage attributes

Guide for use:

Care should be taken when using this value domain as it presents the Australian states/territories in an order different to those most commonly used by agencies such as the Australian Bureau of Statistics (ABS) and the Australian Institute of Health and Welfare (AIHW).

The state/territory order presented in this value domain is known to be used in the underlying information systems of the Medicare Benefits Scheme (MBS) and the Pharmaceutical Benefits Scheme (PBS), and possibly reflects the historical data management practices of some Canberra-based Commonwealth government agencies, whereby Canberra (and by extension, the ACT) was considered to represent something like 'Central office' or 'Head office'.

Agencies such as the ABS and AIHW publish data in state/territory order based on population.

The ABS-preferred order (NSW, Vic., Qld, SA, WA, Tas., NT and ACT) reflects historic relative state/territory populations and has been retained by the ABS to preserve continuity of presentation and minimise the risk of error in the handling or interpreting of data.

The AIHW-preferred order reflects more recent trends in the relative populations of the states/territories, i.e. as above, but with WA before SA and ACT before NT.

Implementation in Data Set Specifications:

[Pharmaceutical Benefits Scheme \(PBS\) state/territory data extract 2013-14 Commonwealth Department of Health](#), Standard 17/12/2015

Implementation start date: 01/07/2013

Implementation end date: 30/06/2014

DSS specific information:

Variable name = PHCY_STATE

In the context of PBS data, this data element describes the location (physical address) of the dispensing pharmacy. It is referred to within the PBS system as 'Pharmacy state'.
