Person—Medicare personal identifier number, N(9)

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Medicare personal identifier number
Synonymous names:	Medicare PIN
METEOR identifier:	601562
Registration status:	Commonwealth Department of Health , Retired 19/10/2023
Definition:	A unique numeric identifier issued for use in identifying a person who has accessed a Medicare claimable service event.
Data Element Concept:	Person—Medicare personal identifier number
Value Domain:	Identifier N(9)

Value domain attributes

Representational attributes

Representation class:	Identifier
Data type:	String
Format:	N(9)
Maximum character length:	9

Data element attributes

Collection and usage attributes

Comments:	<p>The Medicare PIN is system generated. The PIN allocated to a person at initial enrolment stays with that person throughout their existence in Medicare even if the person is supplied with different card numbers. A person can only be shown on two Medicare cards at one time and where a third card is required, a separate PIN is allocated (for example, a child shown on separate cards held by the parents and needs to be included on a carer's card).</p> <p>It is anticipated that at some stage there will be a unique identifier for a consumer across programs (e.g. Medicare, PBS, etc). However, this is currently not the case.</p>
