Data element attributes

Collection and usage attributes

Guide for use:

This item is a sum of the hours of all children enrolled in an early childhood education program at this service.

The child must have been offered a place and be formally enrolled or registered in an early childhood education program and be actively attending to be counted. A child is considered to be actively attending if they:

- attended an early childhood education program for at least one hour in the reference period **OR**
- were absent during the reference period due to illness or extended holiday leave but expected to return.

Exclude children who have:

- only completed enrolment procedures at the service
- left the service (e.g. have ceased education or changed services), or have been absent without explanation for four continuous weeks (excluding school vacations) prior to the reference period.

Non-instructional times such as recess, tea breaks and lunch breaks should be included if the child was under the supervision of the service provider organisation.

The hours enrolled may be less than or equal to the maximum number of hours available for children to attend an early childhood education program, but may exceed the total number of hours children attended the service in the reference period.

Collection methods:

The number of hours that children are enrolled in an early childhood education program should be collected for each early childhood education program available at the service. These data should then be aggregated to the service provider level for reporting purposes.

The total number of hours of an early childhood education program children are enrolled to receive should be reported for the specified reference period.

Jurisdictions which adopt a two week reference period are required to derive their data to a representative reference week.
