Pharmaceutical Benefits Scheme (PBS) prescription —date of supply, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Date of supply
Synonymous names:	Supply date
METEOR identifier:	602767
Registration status:	Commonwealth Department of Health , Retired 19/10/2023
Definition:	The date on which the prescribed medicinal product is supplied by a pharmacist to the patient or PBS consumer, expressed as DDMMYYYY.
Data Element Concept:	Pharmaceutical Benefits Scheme (PBS) prescription—date of supply
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use:	<p>In the context of the PBS, the date of supply represents the date on which the patient or PBS consumer receives the prescribed medicinal products from the pharmacy, i.e. it essentially equates to the date of purchase.</p> <p>In most cases, the date of supply is likely to be the same as the date of dispensing which appears on the label affixed to the packaging of the prescribed medicinal product by the pharmacist. There may be some instances where the patient does not take delivery of the medicinal products immediately, in which case the date of supply and date of dispensing may be different.</p>
