Closing the Gap co-payment eligibility code AAA[NNA]

Identifying and definitional attributes

Metadata item type: Value Domain

603677 **METEOR** identifier:

Registration status: Commonwealth Department of Health, Retired 19/10/2023

Definition: A code representing eligibility for Closing the Gap (CTG) co-payment relief.

Context: The CTG co-payment was established to reduce the cost of Pharmaceutical

Benefits Scheme (PBS) medicines for eligible Aboriginal and Torres Strait Islander

people either living with or at risk of chronic disease.

Representational attributes

Representation class: Code Data type: String Format: AAA[NNA]

Maximum character length:

Value Meaning

Supplementary values: 6 spaces Not applicable, i.e. ineligible for Closing the Gap co-

payment relief

Collection and usage attributes

Guide for use: The first three characters of the code should be 'CTG', followed by a two-digit

number incremented within the practice of the prescriber each time an eligible prescription is written. The sixth character is an alphabetic check digit.

After the numeric component of the codes used by the practice reaches '99', it resets to '01', i.e. the next code allocated by the practice would begin with

'CTG01'.

It is possible for a practice to allocate the same six-digit code more than once on the same day, i.e. if 100 or more eligible prescriptions are written. However, the date of prescription forms part of the check digit calculation algorithm, so while eligible prescriptions written within a practice may share a common first five

characters, the check digit should change from day to day.
